Professional Summary

DevSecOps and Cybersecurity professional with hands-on experience in Kubernetes security, cloud security, vulnerability assessment, penetration testing, and CI/CD security automation. Completed a Cybersecurity Internship at Digitanotion Limited and actively building real-world cloud security and DevSecOps solutions through the Cyber Agoge DevSecOps Bootcamp. Developed practical projects including a secure DevSecOps CI/CD pipeline and a defense-in-depth Kubernetes security platform on Google Kubernetes Engine (GKE). Passionate about securing cloud-native environments and integrating security throughout the software development lifecycle.

Technical Skills

Security

- OWASP Top 10
- Threat Modelling (STRIDE)
- Vulnerability Assessment
- Penetration Testing
- SAST & DAST
- Security Risk Analysis
- Container Security

Cloud & Infrastructure

- Amazon Web Services (AWS)
- Microsoft Azure
- Google Cloud Platform (GCP)
- Terraform
- Kubernetes
- Docker
- Infrastructure as Code (IaC)

CI/CD & Automation

- GitHub Actions
- GitLab CI/CD
- Jenkins
- Python
- Linux

Security Tools

- Trivy
- Falco
- OPA Gatekeeper
- OWASP ZAP
- SonarQube
- Git

Monitoring & Logging

- AWS CloudTrail
 - Security Monitoring Fundamentals
 - Log Analysis
-

Projects

Secure DevSecOps CI/CD Pipeline

Designed and implemented a secure CI/CD pipeline integrating automated security testing throughout the software development lifecycle.

Key Implementations

- Static Application Security Testing (SAST)
- Dynamic Application Security Testing (DAST)

- Container image vulnerability scanning
- Infrastructure as Code validation
- Automated security gates within CI/CD workflows

Achievements

- Implemented shift-left security practices within the development pipeline
- Automated vulnerability detection before deployment
- Reduced manual security testing through automated scanning
- Improved software delivery security through integrated security controls

Technologies

GitHub Actions • SonarQube • Trivy • OWASP ZAP • Docker • Terraform

GitHub:

<https://github.com/Ezekiel2708/devsecops-pipeline-project-2>

Kubernetes DevSecOps Security Platform on GKE

Designed and implemented a defense-in-depth Kubernetes security architecture on Google Kubernetes Engine (GKE) for a simulated financial trading platform.

Key Implementations

- Vulnerability scanning using Trivy
- Runtime threat detection using Falco
- Policy enforcement using OPA Gatekeeper
- Kubernetes Network Policies
- RBAC hardening and least-privilege access controls

Achievements

- Built a layered Kubernetes security architecture
- Implemented runtime threat monitoring and alerting
- Enforced policy-as-code security controls
- Demonstrated network segmentation and workload isolation

Technologies

GKE • Kubernetes • Trivy • Falco • OPA Gatekeeper • RBAC • Network Policies

Experience

Co-Founder

Eguds Ltd

2024 – Present

- Co-founded a technology services company providing IT solutions and infrastructure services.
 - Led cybersecurity and cloud security initiatives for internal and client projects.
 - Assisted with system deployments, infrastructure setup, and technical solution delivery.
 - Contributed to security-focused technology projects and business growth initiatives.
-

Cybersecurity Intern

Digitanotion Limited

2025

- Conducted vulnerability assessments and penetration testing exercises.
 - Performed OSINT investigations and security research.
 - Analyzed OWASP Top 10 vulnerabilities and CVEs.
 - Produced technical reports and remediation recommendations.
 - Participated in hands-on security challenges and risk mitigation exercises.
-

Certifications

Cyber Agoge DevSecOps Bootcamp

Cyber Agoge

2025 – Present

Cybersecurity Internship Program

Digitanotion Limited

May 2025

Advent of Cyber

Education

Bachelor of Science (B.Sc.) Information Technology

Miva Open University

2026 – Present
